

Data Report: March 2024

(showing data to the end of February 2024)

This report provides data on Foodbank use up to the previous month.

Key messages from the data:

- August was our busiest month ever with 1752 visits (1919 if visits for extras are included). Since then, every month other than January are seen a reduction in the number of visits. (see TABLE 1 and GRAPHS 1 and 2 on page 2). In February, the number of visits was 13% lower than in February 2023, and lower even than February 2022 (see GRAPH 1) in January, the number of visits was nearly identical to January 2023.
- GRAPH 4 on page 4 shows that the most significant reduction was seen in family parcels.
- TABLE 3 shows that the proportion of people receiving food from us who are children has been 32% in 2024. GRAPH 5 on page 5 shows that the proportion of people receiving food who are children continues to be remarkably similar at Viewforth and Linton Lane. The proportion is much lower at New Volunteer House and Burntisland. This is relevant for the services that are targeted at our various centres.
- TABLE 4 shows that 10% of our visits in 2024 have been to Burntisland. Viewforth continues to the busiest with 40% of our visits. Only 2% of our visits are to Link Living (clients require a referral form from an agency to get food there).
- GRAPH 7 on page 7 shows the number of different parcel sizes we gave out last month at each of our distribution centres. It shows a continued clear difference in the proportion of different parcels given out there are considerably less family parcels given out at New Volunteer House and Burntisland. Linton Lane is the only centre at which the most frequent parcel given out is family size. At every other centre the most common parcel size is for a single person. This represents a marked change at Viewforth, where previously the most common parcel size was always a family sized one.

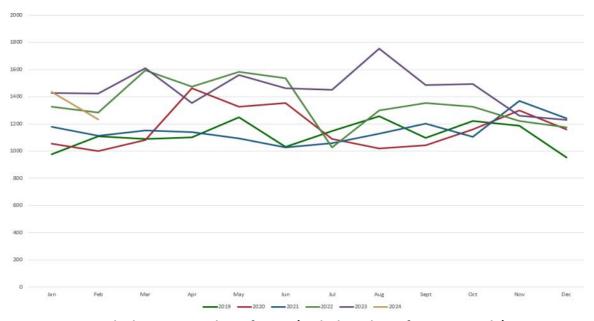

NB: In July 2022 we made significant changes to our way of working as from that date we limited people to one food parcel per week. Previously, we limited people to one every 3 days, so some received more than one parcel in a week. Our volunteers may still provide some extras in the same week, but not more than one food parcel. We required to make these changes as the increase in demand for our services, increases in food prices and reductions in donations meant that we were not financially sustainable. This change is very likely to have reduced the number of visits we record each month since mid-July.

NUMBER OF VISITS TO THE FOODBANK

TABLE 1: table showing number of visits (not including visits for extras only) —and the change from the same month in the previous year as a percentage

	2023	2024	% change 2023 - 2024

GRAPH 2: Graph showing number of visits (including those for extras only)

DIFFERENT PARCEL SIZES DISTRIBUTED AND THE NUMBER OF MEALS PROVIDED

GRAPH 3: Graph showing the total number of meals provided in 2020 to date

(NB the total number of meals figure is calculated by multiplying the number of parcels x size of parcel (single, couple or family etc) x 3 days x 3 meals a day.

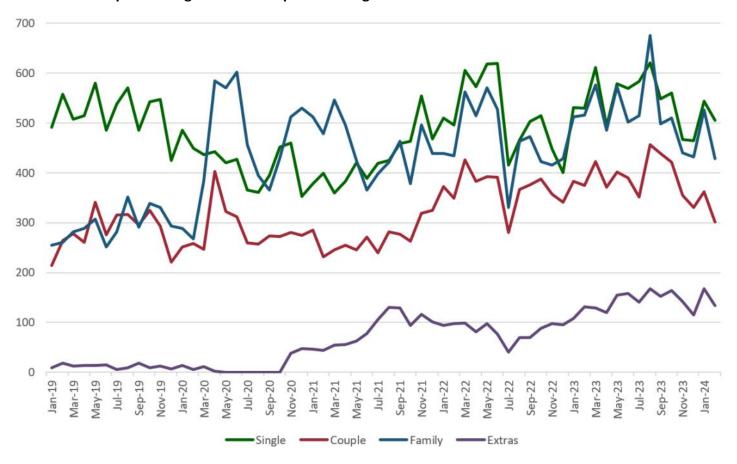

Therefore it is an indicative and not exact figure. As 'Extras only' means that a full parcel was not given on that visit, they have not been taken into account in calculating the total number of meals or people provided with food.)

TABLE 2: table showing data from this and previous year on:

- the number of different parcel sizes given out (including extras)
- the total number of meals provided (see methodology above)
- the percentage change from the previous year in the number of meals provided
- the proportion of single parcels and the proportion of family parcels.

month	Single	Couple	Family	Single + Couple	Extras	Total number of meals provided	total number of visits (incl extras)	%age change from previous year in number of meals pro- vided	proportion of family
